Bengaluru, Karnataka | 9353026548 | karunamnaik59@gmail.com | [linkedin.com/in/karunamnaik](https://www.linkedin.com/in/karunamnaik) | github.com/karuna174

SUMMARY

Computer Science graduate with a CGPA of 8.45/10 and hands-on experience in full-stack web development, SQL, and machine learning. Built a Simple Python Interpreter and a Crop Recommendation System during coursework. Proficient in Python, JavaScript, and SQL, with strong foundations in DSA and OOP. Seeking a Software Developer role to build reliable software solutions.

TECHNICAL SKILLS

Programming: Python, JavaScript

Web: HTML5, CSS3

Backend: Python, REST API basics

Database: SQL, MySQL — queries, joins, data manipulation

Machine Learning: Scikit-learn, Pandas, NumPy, data preprocessing, predictive modeling

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA)

Tools: Git, GitHub, Jupyter Notebook, VS Code

INTERNSHIP EXPERIENCE

Python-Full Stack Intern — Dhee Coding Lab (DCL), Bengaluru

Mar 2026 – Present

- Developed front-end components using HTML, CSS, and JavaScript for 4 web application features, improving UI consistency across pages.
- Implemented SQL queries for efficient data retrieval, manipulation, and database management using MySQL.
- Debugged and resolved 10+ application issues, reducing reported bugs and improving feature stability.
- Gained hands-on exposure to the full Software Development Life Cycle (SDLC) and production application support processes.

PROJECTS

Simple Interpreter in Python — Python, OOP, Lexical Analysis, Parsing, Data Structures

- Developed a simple interpreter to understand the internal working of programming languages by implementing lexer, parser, and interpreter components.
- Implemented tokenization, syntax parsing, expression evaluation, variable assignment, and execution of Pascal-like statements.
- Applied object-oriented programming concepts to design interpreter components and manage execution flow.

Soil-Based Crop Recommendation System — Python, Scikit-learn, Pandas, NumPy

- Built a machine learning classification model using soil parameters (Nitrogen, Phosphorus, Potassium, pH, temperature) to recommend suitable crops, achieving 90% accuracy.
- Performed data preprocessing with Pandas and NumPy — cleaning, feature engineering, and handling missing values on a dataset of 1,500+ records.
- Compared classification algorithms (Random Forest, Decision Tree) and selected the best-performing model.

EDUCATION

B.E. in Computer Science and Engineering — East West College of Engineering, Bengaluru

2026 | CGPA: 8.45/10

Pre-University (PCMC) — St Clare PU College, Bengaluru

2022 | Percentage: 79%

SSLC — Mother Teresa High School, Bengaluru

2020 | Percentage: 92%

CERTIFICATIONS

- Python Fundamentals** — Infosys Springboard
- Python for Beginners: Data Structures** — Coursera Project Network
- Machine Learning & Applications** — Skill Development Program

LANGUAGES

English, Hindi, Kannada
